

GALLERIA  DALLAS

HOLIDAY FUN FACTS

Debuting in 1984, the Galleria Dallas holiday tree is the tallest indoor holiday tree in the U.S.

The holiday tree towers 4-stories tall, 95 ft above the ice skating rink & is topped by a 100 lb 10' LED star (first of its kind in the U.S.).

It displays 450,000 twinkling LED lights, 10,000 colored ball ornaments + 1,700 branches.

More skaters ice skate around the tree than around the one at Rockefeller Center in NYC during the holiday season (we don't shut down during bad weather).

During each Grand Tree Lighting Ceremony, "Missile Toes", the back-flipping Santa Claus shoots fireworks off his skates.

During the "Illumination Celebration" the tree lights flash to specially orchestrated music.

It takes nearly 50 of Santa's helpers almost 48 hours to erect the tree + a total of 40 people, working 5 days, to install all of the holiday interior décor, including Santa's Village.

There are 44 palm trees lining Level 3. When wrapped, they add another 50,000 LED lights. Two 36' trees, two 12' trees & six 9' trees are also on display throughout the shopping center. They have approximately 40,000 more LED lights.

640 nuts, bolts & washers hold the holiday tree together.

The holiday tree weighs 5 tons (equivalent to 10 cars).

Galleria Dallas employs 60+ Santa-suited parking attendants during the holidays + 20 Dallas Police officers to help direct traffic.

The Parkway is adorned with 20 trees wrapped in 50,000 red LED lights & a grand 36-foot holiday tree at the entrance with 30,000 LED lights + 2,000 ornaments.

Ten palm trees in The Alley are wrapped in 20,000 red LED lights.

Galleria Dallas hosts an exclusive Chanukah lighting with a 15 ft Menorah.
